

Apr 21st Jan'y 78

Dear Doctor.

Katie showed me your letter two Boats ago. - Yes I have some spare copies of Flora - ask Blakeman & Co what was their retail price - I don't know, & tell me how to send. See Coulter's

Gazette for Jan'y & Feb'y for an article of mine - New Southern plants accumulate
Guthrie sends by to day's boat some queer things
I dip again into Panicum & shall print notes
In Manual you have "P. dichod. L!" what
one is it - Is it that pubescent low (8'-10') one
with a crowded panicle that Baker used to
get about Ipswich with purplish spikelets?
If you have a spare one which you think
the same as that of Linn. I want a fine
I would much prefer to discard it & Lamark's
P. nodiflorum - both meaningless

Glad to find you both back - say so to Mrs G.
Boat came a day earlier kept me napping
have no time for further words
A. Chapman
